- *Fall Detection* • *Dementia* • *Independency*

Introducing the *Life Minder* that works anywhere – not just at home. Retain your independency and start living again. Go out and meet your friends, play golf or go fishing. *Life Minder* has been designed to assist those that require just that little bit of help each day. If you have just been discharged from hospital or you choose to stay living in your home the *Life Minder* will be your guardian by contacting your family in the case of any emergency.

Fall Detection and SOS Calls. *Life Minder* automatically detects a serious fall (subject to the type of fall). When a fall is detected or the SOS button is pressed the *Life Minder* immediately starts calling up to 5 nominated mobiles sending a SMS giving the reason for the call, such as “Help” “Fall”. Using GPS and Google Maps the location can be found within 2 meters. Both parties are also able to conduct a clear two-way voice conversation. The *Life Minder* will keep calling until answered.

Dementia. *Life Minder* is a must for people who live with Dementia. Just set a GEO fence around the home, *Life Minder* will alert nominated mobiles as soon as the wearer passes through the programmed distance. The User can be constantly tracked for their location by simply sending a SMS “loc” message to the *Life Minder* for a GPS location request.

Independency. It is perfect for people who want to retain their independency while feeling safe wherever they are – not just at home. The User can go wherever they want knowing they can be located, or in an emergency by pressing the SOS button the *Life Minder* will alert the nominated mobiles. *Life Minder* can be called by nominated mobiles, there is no need to carry another mobile phone with you.

Life Minder is water resistant (IPX5) and can be worn around wet areas. It can be attached to a belt, a neck lanyard or simply clipped onto a key ring. It operates as a standard mobile but without the many features that can confuse.

The *Life Minder* operates on the 3G, 4G GSM network which covers 98.5% population of Australia.

The *Life Minder* was awarded the ‘Reddot ’ award in 2015, and is German designed engineering with Swiss precision GPS technology. *Life Minder* was recommended by Choice Magazine as the best personal safety alarm.

No locked in contracts or monitoring fees, a 12-month warranty and a 14-day money-back guarantee.

Price includes, sim card starter pack, set up and delivery.

Life Minder

Personal Safety Alarm

For Tonic Clonic Seizures - Sensing What Matters

Get Your Freedom Back, Go Anywhere with the Life Minder

Falls resulting from a Tonic Clonic seizure can be fatal if a fall is not detected quickly, family or friends can be alerted within seconds that you need HELP.

There have been instances when a mother has been in the community with her children and has experienced a Tonic Clonic seizure. This is a very serious situation that is potentially life threatening also placing the children at risk.

The *Life Minder* automatically detects the sudden impact of a fall, or, by pressing the 'SOS help button', the five (5) nominated mobiles receive a SMS 'HELP' or 'FALL' message. Included in the message is a link via Google Maps for the GPS location. The two (2) parties can hold a clear two-way voice conversation.

The *Life Minder* is a mobile phone without all the complicated features thereby making it easy to use. Any nominated mobile that knows the *Life Minder* number can call it for a hands-free conversation. By sending a "loc" SMS command to the Life Minder it will give the GPS location within 2 meters.

It is IPX5 water resistant and therefore can be used around wet areas.

Further information regarding the Life Minder can be sourced through each Australian State Epilepsy Association. Go to www.epilepsyaustralia.net

with GPS Location - A Potential Life Saving Device

Work Health & Safety (WHS)

The personal *Life Minder* has been designed with the intention of alerting management to potential danger/s to their employees such as a serious fall or entering dangerous areas. It will be a valuable addition to the existing Work Health and Safety (WHS) procedures your company has already in place.

The *Life Minder* will enable management to supply their employees with a vital communication link that will alert them of a potential danger or dangers in the workplace.

The *Life Minder* has application/s in the workplace as a tool to mitigate risk/s. In situations, such as a critical emergency, time can be of the essence. The use of the personal *Life Minder* can result in the possibility of saving a life or lives and eliminating serious implications or a fatality.

A Person Conducting a Business or Undertaking (PCBU) has a primary duty of care to workers and others pursuant to Work Health and Safety (WHS) legislation, in particular Section 19 WHS Act 2011.

This duty equates to persons being exposed to perceivable risk so far as is reasonably practicable, the Health & Safety of persons (Workers & Others) is not put at risk as a result of the conduct or undertaking of the PCBU.

The *Life Minder* uses GSM* as its means of sending SMS messages, including two-way voice from the *Life Minder* to nominated mobiles. Any of the nominated mobiles can SMS or call the *Life Minder* using GSM and GPS for tracking the user's location linked via Google Maps.

The *Life Minder* has applications for person/s who work in isolation, or isolated areas i.e. Manufacturing, Heavy and Construction Industry, Transport, Councils, Forestry, Emergency Personnel, Farmers etc.

The *Life Minder* also has applications in the Hospitality & Aged Care industries that includes, but is not limited to Dementia and people living at home in isolation.

The primary purpose of the personal *Life Minder* is keeping in contact with persons and/or alerting others to potential personal safety issues. The *Life Minder* clearly has an application in the workplace for the personal safety of all employees.

The *Life Minder* will be a beneficial addition to a company's Work Health & Safety Policies & Procedures.

* The *Life Minder* is dependent on connectivity to the GSM network.
